TIME VISUALIZATION

ADVANCED D3.JS

TIME VISUALIZATION

what is time?

Passé, présent et futur

Unidirectionnel

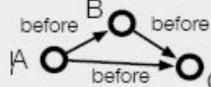

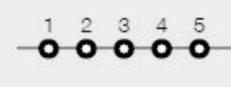

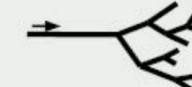

Permet la séquence d'événements

Permet de mesurer la durée d'événements

Permet de comparer des mesures aux mêmes instants

Exemples de données temporelles (dont la composante principale est le temps) : calendrier, climat, etc.

TIME VISUALIZATION

scale	 ordinal	 discrete	 continuous
scope	 point-based	 interval-based	
arrangement	 linear	 cyclic	
viewpoint	 ordered	 branching	 multiple perspectives

TIME VISUALIZATION: TASKS!
